

Since 2014, we continued the 50 years history of the previous Carini Spa, pursuing the excellence in the construction of every single item in the power transmission world.

Following the lead of the founder, we maintained the entire productive manufacturing process inside the company, achieving high quality, and constantly increasing the know how.

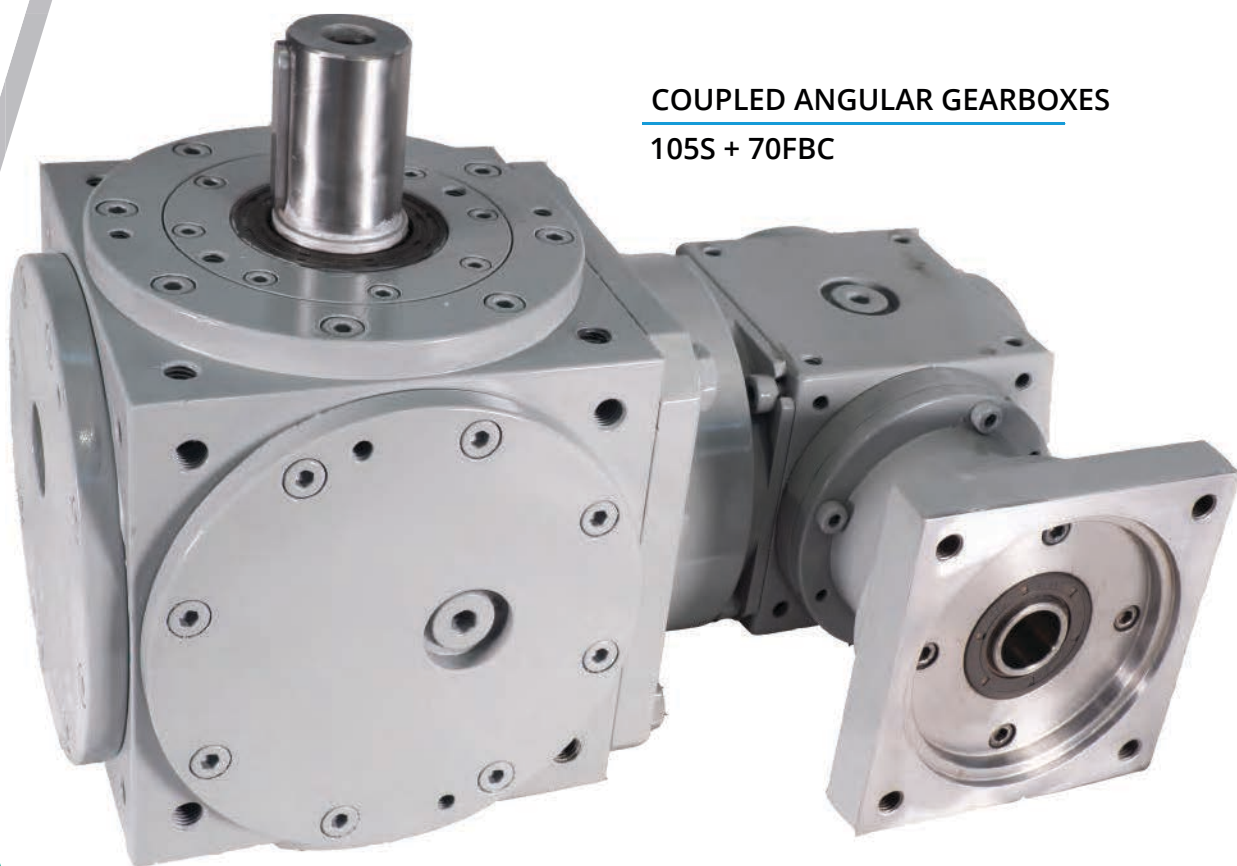

The arrival of Industry 4.0 system, allowed us to develop a modern system of data sharing and integration among men, tools and measuring systems.
